

BOATERS ARE STILL OUT IN THE COLD!

The government promised that no one would be left out in the cold this winter, but **itinerant boat dwellers (and many others living off-grid) still haven't received a penny towards their energy bills...**whilst second home owners have been handed over £200 million for homes they aren't even living in.

Let's hold the government to their word, and make sure that no one is forgotten about in this cost-of-living crisis.
